

“Realize Your Vision”

PVE has successfully designed, permitted and inspected well pads, oil & gas production facilities, and water & wastewater impoundment storage facilities throughout all major US shale regions. We provide the expert planning and design services necessary to meet clients’ schedules and permitting requirements. Our permitting services include beneficial use permits for wastewater treatment and reuse (123-Permits) as well as Spill Prevention Control and Countermeasure Plans, and Preparedness Prevention and Contingency Plans.

PVE has been involved in numerous pipeline projects throughout the United States. Our professionals have years of experience in surveying, engineering, design, and permitting pipeline projects for midstream clients, as well as some of the largest transmission companies in the country.

The PVE Title Mapping Team provides unparalleled service and value in resolving clouds and issues apparent in property boundary mapping. We deliver a reasonable geographic location of surface, mineral and lease boundaries for our clients’ assets. Our collaborative team of Attorneys, Surveyors, Engineers, GIS Specialists, and Industry Experts join forces to provide complete Title Mapping and Management Solutions that identify challenges early, minimize risk throughout and result in a solid position for every project.

QUALIFICATIONS AND SERVICES

- Routing Studies, Due Diligence, & Desktop Analysis
- Well, Tank Pad, and Pipeline Site Design and Engineering
- Roadway Design & DOT Highway Occupancy Permits
- PCSM and E&S Plans for NPDES Permitting
- Site Inspections & Construction Management
- Wetland Studies & Field Infiltration Testing
- General Permits, Federal, State, & Local
- Well Plat Plans & Easement Exhibits
- Construction Quantity Takeoffs & Roadway Bonding
- Property, Lease, Pipeline, & Condemnation Surveys
- Roadway Video Condition Surveys
- Property Title Review & Mapping Curative Reports
- Courthouse / Online Property Research
- Surface Boundary & Mineral / Lease Asset Mapping
- Field Recon / Parole Evidence Surveys
- Purchase and Integrity Management
- Natural Resources Delineation/Permitting
- Threatened and Endangered Species Habitat Analysis
- Cultural Resource / Archaeological Assessments
- Right-of-Way Acquisition & Road & Rail Crossing Permits
- Landowner Boundary Reconnaissance
