

“Realize Your Vision”

Fuel spills, hazardous waste sites, vapor intrusion, landfills, road salt contamination—every situation is different. PVE’s highly skilled team of Geologists, Hydrogeologists, GIS Specialists, Environmental Scientists and Technicians all respond with experience and technical know-how. Our seasoned managers help clients understand and navigate environmental liabilities and regulatory requirements.

We serve a diverse clientele: Commercial and industrial businesses, institutions, lenders, law firms and all levels of government agencies and authorities. Through the years we’ve earned a reputation for responding to each of our clients’ needs and priorities.

New pressures and challenges relating to water, energy and climate have brought new opportunities and we are applying our technical and regulatory skills to projects as diverse as brownfield redevelopment, carbon storage and shale gas.

QUALIFICATIONS AND SERVICES

- Site Assessment
- Soil and Groundwater Spill Investigations
- Vapor Intrusion Studies
- Hazardous Waste Site Investigation
- Asbestos Consulting
- Permitting and Compliance
- Underground Injection Control (UIC) Disposal Wells
- Reservoir Evaluation & Gas Storage Facilities
- Petroleum Storage Tank Compliance
- Brownfield Remediation
- Hydrogeologic Evaluation and Groundwater Modeling
- GIS Services
- Acid Mine (Rock) Drainage Characterization & Remediation
